In October, an event called Maker Faire will be held in Pittsburgh. <http://makerfairepittsburgh.com/>

Maker Faire is a community-based learning event that inspires everyone to become a maker! The Faire features technology, art, craft, electronics, pyrotechnics, engineering, and other projects created by makers themselves, including student projects, robotics, 3D printers and CNC mills, textile arts and crafts, home energy monitoring, rockets and R/C toys, sustainability, green tech, radios, vintage computers and game systems, electronics, electric cars, biology/biotech and chemistry projects, puppets, kites, bicycles, unusual tools or machines & more. In addition to displays and exhibits, Maker Faire Pittsburgh will feature special performances, speakers, demonstrations and workshops featuring 3D printing, laser cutting, microcontrollers, silk screening... and so much more.

Maker Faire is the Greatest Show (and Tell) on Earth—a family-friendly showcase of invention, creativity and resourcefulness, and a celebration of the Maker Movement. It's a place where people show what they are making, and share what they are learning.

Makers range from tech enthusiasts to crafters to homesteaders to scientists to garage tinkerers. They are of all ages and backgrounds. The aim of Maker Faire is to entertain, inform, connect and grow this community.

Perhaps in the future, Chapter 45 will be a part of this event to show our creativity and also help to further the EAA message. A few of us plan to attend the event this year to see what it is all about and how we can be a part of it next year. Watch for an announcement of when we plan to go. It is held at the Childrens Museum on October 10th and 11th , 10AM - 5:00pm

News

Long time member, John Twigg purchased Ed Burke's T-18

It was on display at the picnic and John purchased it from Ed's son, Doug Burke who is also a Chapter 45 member. Here is a picture of the airplane at the picnic and then also on the chapter trailer on it's way to his home to be reconstructed. Chapter members at the Monday night workshops helped to disassemble the airplane and prepare it for the short ride to John's home.
