JULY 2014

Webmaster
 David Herrington
www.monvalleyrc.com

**MVRC Monthly Meeting on Friday, July 11th
 at the Airfield at 7:00 PM**

**!!!WITH THE 4TH OF JULY FALLING ON THE FIRST FRIDAY,
 THE JULY MEETING WILL BE THE FOLLOWING WEEK
 ON JULY 11TH.!!!**

President's Corner

Fellow MVRC Members:

More improvements for our airfield by the County Park! The parking area will be extended and the existing area will be upgraded. The EC will determine the extension details for the park.

We have also been notified by Cedar Creek Park officers that the permanent restroom funding is available and the ordering of the restroom should take place in August. We have also been informed that they will now begin to investigate electric service to determine how much that will cost. Thanks to

everyone for all their efforts especially the team that supported the March For Parks.

There was a great turnout for the float fly at ACME Dam. AJ and others have sent in some photos. Please remember that our newsletter depends on much of your input. Please email your news to us so we can include the information in the newsletter.

Keep healthy, be safe, have fun flying!

AL Kozusko, MVRC President

The only time you have too much fuel is when you're on fire.

Flying is the second greatest thrill known to man. Landing is the first!

Did you ever wonder why "abbreviated" is such a long word, why doctors call what they do "practice", why lemon juice is made with artificial flavor, while dishwashing liquid is made with real lemons, why the man who invests all your money is called a broker?

MVRC minutes of meeting 6-6-2014

Call to order 7:03
Officers, president and vp
Treasury report is stable

Club Activities

Acme Float Fly

Rick, rookie in float fly

Jim--flying 2 at once?

Everyone knows a 'good' landing is one from which you can walk away. But a 'great landing' is one after which you can use the airplane again.

Any attempt to stretch fuel is guaranteed to increase headwind.

A pilot is a confused soul who talks about women when he's flying, and about flying when he's with a woman.

Beautiful RC Sailboat

George Blum & his pride & joy

Here we go!!!

His CUB is older than most members age

Try to keep the number of your landings equal to the number of your takeoffs.

There are old pilots, and there are bold pilots, but there are no old, bold, pilots!

Gravity never loses! The best you can hope for is a draw!

Pete La Cava-wants a Float Plane

Now that summer is in full swing and a little more flying can be accomplished between raindrops and "tornados", all should consider that "our second home" must be maintained in a fashion matching our "first home". At the end of your day at the field, you should straighten and clean up your "trash" and your neighbors trash that was left behind. Tables and chairs should be aligned neatly. Use the trash cans.
Be courteous to those maintaining and cutting the grass. Aid them in moving benches, etc. to make their job easier ***and there is to be no flying while the field is being cut!!***
