

## President's Corner Aug 2021

MVRC Members,

The month of August has arrived and so has the Cedar Creek Park Funfest. At this yearly event, Mon Valley RC traditionally has several members represent the club displaying various models of all types and sizes. This is a great opportunity to increase awareness of our field and or club. I hope that many of you will participate in this event. Details will be given at the meeting regarding early entrance passes and times. Also, please stop by and hang with us for a while even if you cannot stay all day.

A very important issue concerning our club that must be dealt is the sharing of the mowing duties. It is understandable that some of our due to health reasons, work demands, or other reasons can't mow. Unfortunately these duties have fallen on only a few members and after several years has become tiresome for them. Therefore the Executive Committee and officers are looking for ways to create an incentive to increase the amount of members willing to mow. Please share your ideas.

Disposal of hazardous waste, this includes but is not limited to batteries and fuel, is prohibited at the field. It is recommended that you always have some means to safely transport damaged batteries home for disposal (metal ammo box or fireproof battery bag).

Is anyone aware of the location of the transmitters for the club trainers? If so, please inform an officer or EC member.

It is recommended that all members take The Recreational UAS Safety Test (TRUST) as soon as possible. It will soon be required that you carry a card that you print after passing this test. This test is designed so you can't fail.

I hope to see you at the field on Friday at 7pm for our monthly meeting and on Sunday at the Funfest in the park between 10 am and 6pm.

If you are bringing displays, arrive at 9am at the entrance of the Funfest.

Thanks,

Mike Eiben
